(Dollyland Media) Singer Dolly Parton just passed away, reportedly after a“brief (turbo) cancer battle.”

Dolly Parton didn't just jab in public. She helped funded mRNA research at Vanderbilt University to help create the CV19 Vax that has killed and maimed millions.

Did they really need her money? Of course not. What they needed was someone to get on camera who had millions of fans who that would do anything she said. They are devious Satanic bastards that play on our souls though our pride.

They succeeded and Dolly paid the ultimate price.

They got her to get the shot she helped produce on camera. They even got her to adapt one of her songs to encourage people to get their CV19 Vax. She changed the name in her hit song "Jolene" to "Vaccine."

While she was doing this in 2021, CV19 Vax deaths and injuries were already piling up and being covered up by the CDC and FDA. She should have known, but her myopic world was already thinned out in 2021 to declare any negative information about the Vax "misinformation".

But, Truth is like a Lion and there was enough data out there to tell anybody with a brain that something was amiss. Over the years since she convinced many people to Jab, the massively strong evidence against the Jab surfaced against the tide. That evidence apparently never reached her eyes and ears.

I have no hatred for anyone, let alone someone like Parton who did a lot of great things to help people over her lifetime. On balance, that doesn't tip the scales for me. So, how can we lionize Dolly Parton when she likely passed on the fate she suffered through at the end to so many of her adoring fans that followed her ignorant lead? My left wing local R&R radio station has been playing her music ALL DAY.

Nice lady. Good heart, good motives and jugs. But, no brain.

As she was dying from what we now call Vax induced "turbo cancer", she made a statement to her nephew. Nowhere in her last, dying words was there any sense of humility about how she might have been wrong about the Jab and especially her financing of the project. No regrets at all? Were you really that brainwashed?

This makes her not just an innocent victim but an active player, even indirectly. In my view, that is hard to forgive, except by Him.

After the last 5 years, I have discovered how painfully hard it is for people to admit to either taking the Jab to begin with or (worse) inducing others to do so as opinion leaders in media, government, medical and education professions.

Vaccine, Vaccine sung to Jolene, Jolene and based on the hit Two Doors Down:

Two more jabs, were laughing and drinkin' and having a party
And, two jabs more, and we'll soon be not around.

Actual lyrics here....no conspiracy.

Dolly Parton's ego and pride to "help the world" may have caused her fall. There are so many out there like Dolly, aren't there?

And, as a Christian, she should have known about Satan's trap.

May she rest in peace.

Sic Semper Tyrannis
